

## **SMART METER: Benefits**

Your new Smart Meter gives you access to data that offers insight into how you use energy at more frequent intervals than ever before - putting you in control of your energy expenses each month.

So, instead of anticipating that energy bill each month, you can now track your usage and costs daily. Now, that's smart!

Not only can you view your information through your Dominion Energy account online - you can see this information \*wherever\* you are with the Dominion Energy Mobile App.

From there - you can even set usage alerts to notify you when your usage meets or exceeds a level you set and allowing you to make adjustments when \*you\* need it.

Smart Meter technology will also provide a better level of service for you during storms.

All of this means a more efficient, reliable and higher level of service for you. How Smart!
