Shockoe Substation Fence Replacement

Dear Neighbor:

At Dominion Energy, we are committed to keeping you informed of upcoming work in your neighborhood. In early 2024, we will upgrade the fencing and enhance security measures at Shockoe Substation located off Valley Road in Richmond, Virginia.

This project is part of our Grid Transformation Plan with the aim of modernizing the electric grid to meet the changing landscape of the energy industry while allowing us to continue to provide safe, reliable, and affordable electric service to your community.

Construction will last for about six months from early 2024 through early summer 2024. During this time, you may see increased activity and construction traffic in the area. We do not anticipate any impacts to your electric service as part of this work.

If you have any questions or would like to speak to our project team, please reach out to us at 888-291-0190 or powerline@dominionenergy.com. You can find more information about our Grid Transformation Plan substation projects at www.DominionEnergy.com/GTPsubs.

Thank you for your patience and understanding as we work to power your every day.

Sincerely,

The Electric Transmission Project Team
