## Thalia Substation Security Fence

At Dominion Energy, we are committed to keeping you informed of upcoming work in your community. As part of our Grid Transformation Plan to modernize the electric grid, we are planning to upgrade safety and security measures at Thalia Substation, located off Garrett Drive in Virginia Beach.

TO LEARN  
MORE

In order to protect electric infrastructure and ensure reliable service for our customers, we will replace the existing chain link fence topped with barbed wire with a taller fence without barbed wire. Additional security technologies will also be installed to better deter, detect, delay,

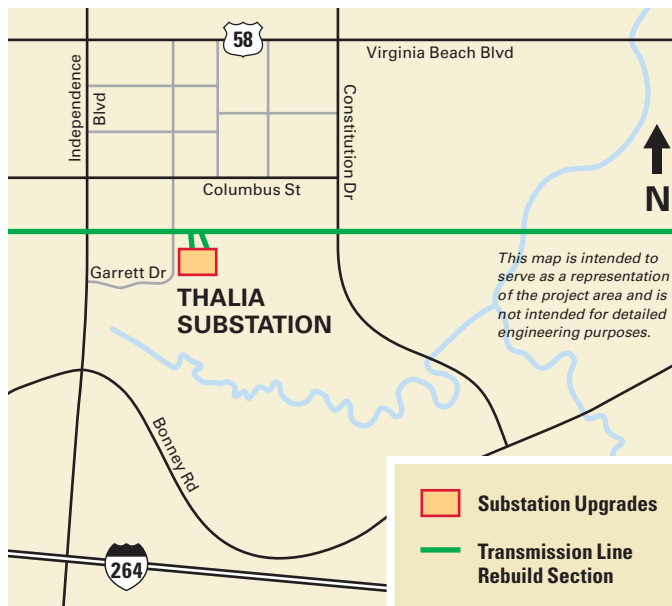

and monitor potential threats. Finally, a sidewalk will be installed between Thalia Substation and Garrett Drive.

We anticipate construction will begin in early 2025 and last for about six months, pending any permitting or weather delays. We do not anticipate any interruptions to your electric service as a result of this project.

Thank you for your patience as we work to increase the safety and reliability of your electric service.
