## **Bristers Substation Expansion Project**

Dear Neighbor:

At Dominion Energy, we are committed to providing the latest information on projects in the communities we serve. We would like to provide an update on the proposed expansion of Bristers Substation on Cromwell Road in southeast Fauquier County, Virginia.

As we announced in November 2022, we have identified the need to install additional electric transmission infrastructure at Bristers Substation. This new equipment will maintain reliable electric service and comply with federal energy standards. The proposed expansion will be near Bristers Substation on the same Dominion-owned property. To mitigate impacts to wetlands, it will have a separate footprint and security fence. The expansion will be named Anderson Branch Substation and will work in tandem with existing Bristers Substation.

Over the past several months, our project team has been refining our plans and working with Fauquier County staff and officials to obtain the necessary approvals. In a public meeting on August 10, 2023, the Fauquier County Board of Supervisors approved the Special Exception for this project. The enclosed materials reflect the latest plans, including:

- Visual rendering of the proposed substation expansion from Cromwell Road
- Aerial site plan rendering

Our team continues to seek site plan approval as we prepare for construction at Anderson Branch Substation to begin in early 2025. Prior to construction, we will have additional opportunities for neighbors to learn about this project. We look forward to sharing more information soon.
