Cemetery Road 115 kV Substation Project

At Dominion Energy, we are committed to providing the reliable, affordable, and increasingly clean energy that powers our customers every day. You are receiving this postcard because we are preparing to build a new Cemetery Road 115 kilovolt (kV) Substation southeast of Chase City in Mecklenburg County, Virginia. This project will improve electric reliability for all area customers. Cemetery Road Substation will also serve a new natural gas compressor station, which was approved by the Federal Energy Regulatory Commission (FERC).

MORE

In early 2024, we plan to begin construction activities. This includes building an approximately 0.1-mile 115 kV transmission line from a nearby line to connect the new substation to the electric grid. Pending weather and other factors, construction is expected to take about nine months.

Neighbors along Country Club Drive and Draper Road may notice construction vehicles. Please note construction activities for the nearby natural gas compressor station will continue in 2025 after our substation and related transmission line work concludes.

Your electric service is not expected to be interrupted as a result of this project. Thank you for your patience and understanding while we work in your community.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

UPCOMING WORK

EARLY 2024

Substation and transmission line tap construction begins

FALL 2024

Substation and transmission line tap construction completed (expected)
