Lynnhaven to Virginia Beach Fiber Project

AT DOMINION ENERGY, we continually review and analyze our energy infrastructure to provide safe, reliable, and affordable electricity to the communities we serve. You are receiving this postcard because we are preparing to install dual system protection and communication fiber on an existing electric transmission line north of I-264 between our Lynnhaven and Virginia Beach substations located in the City of Virginia Beach, Virginia. This project will improve our communications between substations and provide the necessary resiliency, dependability, and security to operate and monitor the bulk power system.

In the coming months, you may notice personnel in and around the right of way conducting preliminary field work on foot or in vehicles. Our field activities will include evaluating the right of way for potential unauthorized encroachments. Our easement rights state that the entire width of the right of way is to be clear of structures, such as sheds, decks, swimming pools, and playground equipment, and certain types of vegetation (including all trees). This is to ensure the safe and reliable operation of the line, and to protect the community and our crews from energized power lines. To learn about how we maintain property rights and a safe right of way, please visit our website [DominionEnergy.com/RightOfWay](https://www.dominionenergy.com/RightOfWay).

We plan to prepare access to the electric transmission line structures in early 2024. Fiber installation is expected to occur for approximately two months in spring 2024.

Your electric service is not expected to be interrupted as a result of this project. We will continue to update you as activities progress. Thank you for your patience and understanding as we work to complete this important project.

AT DOMINION ENERGY, protecting the grid and making it secure against natural and man-made acts is a top priority. We work alongside government officials to prepare for potential incidents that could affect our ability to provide electricity safely and reliably to the communities we serve. Learn how we're keeping you safe at powerlines101.dominionenergy.com.
