

Dominion Energy Virginia Seeks Proposals for Acquisition of Renewable Development Projects

- *Company seeks to acquire solar, onshore wind and energy storage projects for the benefit of Virginia customers*

RICHMOND, Va. (April 6) – In an annual [Request for Proposals](#) (RFP) issued today, Dominion Energy Virginia (DEV) is seeking proposals for the acquisition of new solar, onshore wind and energy storage development projects in Virginia. The company will host an informational webinar for interested bidders at 1 p.m. EST on May 4. Prospective bidders may sign up for the webinar on the company's [website](#). A separate RFP seeking proposals for Power Purchase Agreements (PPA) will be issued on September 1.

Acquisition of the projects will support Virginia customers' future energy needs as outlined in the company's most recent [Integrated Resource Plan](#). The projects will also help the company achieve the requirements of the Virginia Clean Economy Act (VCEA) and its commitment to Net Zero greenhouse gas emissions by 2050. Additionally, the projects will support local jobs, increase spending in local communities and bring in new tax revenue for local governments.

Proposals will be accepted on a continuous basis throughout the year. The company is interested in proposals for five categories of development assets:

- new photovoltaic ("PV") solar nameplate capacity
- new PV solar generation co-located with energy storage nameplate capacity
- new onshore wind nameplate capacity
- new onshore wind co-located with energy storage nameplate capacity
- new stand-alone energy storage nameplate capacity

For solar proposals, the company is seeking both utility-scale projects that are greater than 3 megawatts (MW), as well as distributed projects that are 3 MW or less. For all proposals, the company will only consider facilities located in Virginia. For distributed projects that are 3 MW or less, the facilities must be located within DEV's service territory where there are location grid benefits to DEV customers. The company also encourages the submission of solar and onshore wind projects on previously developed sites, such as former landfills or industrial uses.

All participating bidders must register by submitting an Intent to Bid Form and an executed Confidentiality Agreement (CA). The Intent to Bid Form, CA and other additional information on this RFP can also be found on the company's [website](#). The completed form and signed CA should be emailed to DEVCleanEnergyRFP-Acquisition@dominionenergy.com.

For additional information or questions regarding the PPA RFP to be issued September 1, please contact DEVCleanEnergyRFP-PPA@dominionenergy.com.
